The Chemical Company

Elastollan® TPU

Elastollan® Thermoplastic Elastomer TPU

Polyether-based Elastollan TPU Grades		
Product	Hardness	Featured Property
1100 series	70A - 74D	Available in UV stabilized and flame retardant grades. Some grades meet FDA compliance, USP Class VI, and NSF 61 standards.
Polyester-based Elastollan TPU Grades		
Product	Hardness	Featured Property
600 series	85A - 95A	General purpose, excellent transparency
800 series	80A - 90A	Excellent transparency
S series	60A - 98A	General purpose
C series	60A - 98A	High performance
HPM Elastollan TPU Grades		
Product	Hardness	Featured Property
C series HPM	60A - 95A	Polyester-based, high performance, exhibiting low and high temperature performance

maxELAST®

Maxelast® Thermoplastic Elastomer TPE

Series	Hardness	Application
P	8A - 99A	Overmolding to PP or standing alone
C	0A - 95A	Clear and transparent grades
S	30A - 75A	Overmolding to Polystyrene
N	50A - 65A	Overmolding to Nylon
F	60A - 96A	Flame retardant & Non-Halogen
D	40A - 90A	Extrusion grades
A	10A - 85A	Overmolding to ABC, PC/ABS, PC

BUSINESS:

Alliance Polymers & Services (APS) in Romulus, MI, is a full service warehousing, distribution, shipping and technical service organization dedicated to helping TPE, TPU and other elastomer marketers and processors with all their product and technical support needs. The firm currently markets and supports Polymax Maxelast® TPEs and BASF Elastollan® TPUs.

APS is owned and operated by three of the industry’s leading marketing and technical support executives, Roger J. Huarng, Stephane Morin and Dr. Ron Sheu, formerly with BASF Corporation. We are committed to long-term partnership, offering highly experienced support, quality products, and advanced inventory management.

FACILITIES:

- Headquarters with labs, sales, compounding service and warehousing in Detroit.
- West Coast Sales & Warehouse in Torrence, CA.
